From Classroom to Virtual

Learn the proven virtual facilitation techniques that generate powerful group results.

Leadership Strategies

Why it Works

This online, instructor-led course covers strategies and techniques for bringing the traditional classroom experience into the virtual environment. Participants will learn how to leverage the unique advantages for learners and trainers available in online platforms.

Although where people gather to learn is shifting, how they learn is still the same. The brain still needs accessible content delivered in a safe, engaging environment. This course provides tools for utilizing the virtual environment to bring the best of the classroom experience to learners.

Learn How To

- Employ the key elements of design and development for creating compelling and effective course materials for the virtual environment
- Employ a checklist of the preparation essentials for the virtual environment
- Incorporate the key elements of a successful start in the virtual environment
- Translate live training best practices to virtual environment
- Describe techniques for managing pace, participants and common challenges in the virtual environment.
- Ensure knowledge transfer in the virtual environment

Ideal For
