

Advanced Strategies for Virtual Engagement

Beyond the basics of virtual meetings: Better Engagement, Better Sessions, Better Results

Leadership Strategies 

Why it Works

While online meeting platforms include several features for engagement, such as polls, chats, whiteboards and breakout groups, few people actually use them, and even fewer know how to couple them with advanced-level engagement strategies. In this course, you will learn to maximize the use of these features plus you will walk away with more than a dozen other techniques used by the engagement experts at Leadership Strategies.

During this course you won't just *learn* what to do, or just see how to do it, **you will actually do it**. You will walk out of this class confident that you can make your next virtual meeting buzz with engagement and excitement.

Why? Because you will have done it in the class and experienced it yourself. Our interactive approach provides participants with opportunities to experience the power of engaging sessions and to replicate it themselves.

Learn How To

- Use the features of online meeting platforms, such as polling, breakout groups, desktop sharing and others to create highly engaging group sessions.
- Incorporate advanced engagement strategies such as Dump and Clump, Rotating Flip Charts, and One Minute Collaboration to yield better results.
- Implement these strategies in a variety of sessions, such as strategy, action planning, status meetings, etc.

Agenda
