# Strategic Thinking

**Half-Day Course for Better Decision Making, Solving Problems and Driving Results**

**Leadership Strategies**

## Why it Works

It is often easy to make tactical decisions that meet the specific needs of a particular situation. But how do you take a strategic approach to problem solving that goes beyond the short-term and delivers solutions that meet the longer term need?

**It starts with strategic thinking.**

In this half-day workshop, you will learn how to use The Drivers Model to apply strategic thinking to making decisions, solving problems, and driving results in a wide variety of situations. You will walk away with a process for thinking about any situation strategically. That is, any time there is a gap between where you are and where you want to be, the tools from the workshop help you think strategically about your vision, the barriers to achieving it, the conditions critical for success, and the strategies you can use to overcome the barriers and create the critical conditions that will sustain both short-term and long-term success.

## As a Result, You Will Learn How To

- Understand what strategic thinking is and what it isn't, when you're doing it and when you're not, and why it's important
- Have a process guide for thinking strategically about any situation
- Learn tools for leveraging the power of strategic thinking across a wide variety of applications

## Ideal For

- **Executives / Business unit leaders / Department heads / Supervisors / Project managers / Program managers / Business analysts**

## Who Need To

- Make short-term or long-term decisions that impact an organization.

## Duration

Half-day Course
